

Algorithm HW2

1. Problem Set

- A. Various Order of Operation Evaluation
- B. Palindrome
- C. Playboard
- D. Tower Challenge

You can find the descriptions (ko, en), sample codes, sample input files, and sample output files in each corresponding folder. Please do not change **java file name and class name**.

2. Preliminaries

Before solving these problems, you should install accurate JDK. If you would like to write your code on IDE such as Eclipse or IntelliJ IDEA, please set the encoding of the IDE to utf-8.

Note: Do not use multithreading, and other external libraries

3. Submitting your Assignment

Submit your java code without changing the file name. Submission form of each problem will be opened in ETL(etl.snu.ac.kr).

DUE DATE: 2021-10-29 23:59:00

4. Grading Criteria

Your homework will be examined with 10 test cases for each problem. Your program should terminate within the time limits. In case of any issues including formatting error, naming error, anything which hinders the automated marking system, you will lose 5 % of the total score.
